Independent Auditor's Report

The Honorable Mayor and Board of Aldermen City of Dyersburg City of Dyersburg, Tennessee

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Dyersburg, Tennessee (the City), as of and for the year ended June 30, 2016, and the related notes to the financial statements, which collectively comprise the City's basic financial statements as listed in the Table of Contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of the Dyersburg Electric System, which is both a major fund and 51 percent, 50 percent, and 72 percent, respectively, of the assets, net position, and revenues of the business-type activities. Those statements were audited by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for Dyersburg Electric System is based solely on the report of the other auditors. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, based on our audit and the report of other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Dyersburg, Tennessee, as of June 30, 2016, and the respective changes in financial position and, where applicable, cash flows thereof and the respective budgetary comparison for the general fund and school general purpose funds for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and the pension schedules as listed in the table of contents be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We and other auditors have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquires of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the City of Dyersburg's basic financial statements. The introductory section, supplementary and other information section, and the other miscellaneous information section – unaudited are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The supplementary and other information section are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supplementary and other information section are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The other miscellaneous information section – unaudited and the introductory section have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated July 22, 2017 on our consideration of the City's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the City's internal control over financial reporting and compliance.

Alexander Thompson Arnold PLLC

Dyersburg, Tennessee July 22, 2017

As management of the City of Dyersburg, we offer readers of the City's financial statements this narrative overview and analysis of the financial activities of the City for the fiscal year ended June 30, 2016.

FINANCIAL HIGHLIGHTS

- The assets and deferred outflows of resources of the City of Dyersburg exceeded its liabilities and deferred inflows of resources at June 30, 2016 by \$97,947,714 (net position). Of this amount, \$3,454,668 is unrestricted and may be used to meet the government's ongoing obligations to citizens and creditors in accordance with the City's fund designation and fiscal policies. See page 19.
- > The City's total net position decreased by \$691,646.
- > At June 30, 2016, the governmental funds reported combined ending fund balances of \$7,763,075, of which \$1,611,949 was unassigned and available for use at the City's discretion. See page 21.
- > Governmental fund balances increased by \$896,270 (page 23) during the year.
- > During the fiscal year ended June 30, 2016, the City's total notes and bonds payable decreased by \$2,502,853 (see page 15 of the report for debt payments by activity).

OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis is intended to serve as an introduction to the City's basic financial statements. The City's basic financial statements are comprised of three components: 1) government-wide financial statements, 2) fund financial statements and 3) notes to the financial statements. This report also contains required, supplementary, and other information in addition to the basic financial statements themselves.

Government-wide financial statements. The government-wide financial statements are designed to provide readers with a broad overview of the City's finances, in a manner similar to a private-sector business.

The Statement of Net Position presents information on all of the City's assets, liabilities, and deferred outflows/inflows of resources with the difference reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the City is improving or deteriorating.

The Statement of Activities presents information showing how the City's net position changed during the fiscal year. All changes in net position are reported when the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in the future fiscal periods (e.g., uncollected taxes and earned but unused compensated absences).

Both of the government-wide financial statements distinguish functions of the City that are principally supported by taxes and intergovernmental revenues (governmental activities) from functions that are intended to recover all or a significant portion of their costs through user fees and charges (business-type activities). The governmental activities of the City include general government, public safety, public works, schools, parks and recreation, and community services. The business-type activities of the City include Gas, Water and Sewer, Solid Waste Management and Electric operations.

The government-wide financial statements can be found on pages 18 - 20 of this report.

Fund financial statements. A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The City, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the City can be divided into two categories - governmental funds and proprietary funds.

Governmental funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike government-wide financial statements, governmental fund financial statements focus on current sources and uses of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term effect of the government's near-term financing decisions. Both the governmental fund's balance sheet and the governmental fund statements of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities.

The City maintains 10 governmental funds. Information is presented separately in the Governmental Fund Balance Sheet and in the Governmental Fund Statement of Revenues, Expenditures, and Changes in Fund Balances for the General Fund and School Fund, all of which are considered to be major funds. Data from the other 8 funds are combined into a single, aggregated presentation. Individual fund data for each of these non-major governmental funds is provided in the form of combining statements elsewhere in this report.

The City adopts an annual appropriated budget for its governmental funds and proprietary funds except for the Electric Fund. Budgetary comparison schedules have been provided for all funds except for proprietary funds to demonstrate compliance with the budget and are presented as required supplemental information.

The basic governmental fund financial statements can be found on pages 21-30 of this report.

Proprietary Funds. The City maintains two types of proprietary funds. Enterprise funds are used to report the same functions presented as business-type activities in the government-wide financial statements. The City uses enterprise funds to account for its gas, water and sewer, solid waste management, and electrical operations. Internal service funds are an accounting device used to accumulate and allocate costs internally to the City's various funds for communication costs and utility billing and collecting costs. Because these services benefit both governmental functions and business-type functions, they have been allocated to governmental activities and business-type activities in the government-wide financial statements.

Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail. The proprietary fund financial statements provide separate information for the Gas, Water and Sewer, and Electric funds since they are considered to be major funds of the City. Because the Solid Waste Management fund is the only remaining enterprise fund, it is being presented as a major fund even though it does not meet the criteria of a major fund established in Government Accounting Standards Board (GASB) Statement No 34. All internal service funds are combined into a single aggregated presentation in the proprietary fund financial statements. Individual fund data for the internal service funds is provided in the form of combining statements elsewhere in this report.

The basic proprietary fund financial statements can be found on pages 31-35 of this report.

Notes to the Financial Statements. The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements can be found on pages 39-73 of this report.

The combining statements referred to earlier in connection with non-major governmental funds and internal service funds are presented following the required supplementary information on pensions. Combining and individual statements and schedules can be found on pages 82-99 of this report.

GOVERNMENTAL-WIDE FINANCIAL ANALYSIS

The City's combined net position decreased \$691,646 or less than 1% from 2015 to 2016. Net position decreased \$988,350 in governmental activities, with business-type activities increasing \$296,704. Combined net position (assets exceeding liabilities and deferred inflows of resources) was \$97,947,714 at June 30, 2016. The table below provides a comparative summary of the City's net position as of June 30, 2016 and 2015.

Net position:										,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,		11,100,011
Investment in capital assets,												
net of related debt		30,268,613		32,057,416		62,251,111		59,717,066		92,519,724		91,774,482
Restricted		737,659		4,308,888		1,235,663		1,679,116		1,973,322		5,988,004
Unrestricted		(11,808,023)		(16,179,705)	15,262,691		17,056,579			3,454,668		876,874
Total net position	\$	19,198,249	\$	20,186,599	\$	78,749,465	\$	78,452,761	\$	97,947,714	\$	98,639,360

The largest portion of the City's net position (\$92,519,724 or 94%) reflects its investments in capital assets, less any debt used to acquire those assets that is still outstanding. The net investment in capital assets increased \$745,242 from 2015. Of this increase governmental activities decreased \$1,788,803, and business-type activities increased \$2,534,045. Although the City's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

An additional portion of the City's net position (\$1,973,322 or 2%) represents resources that are subject to external restriction on how they may be used. Restricted net position decreased \$4,014,682 from 2015. The remaining balance of net position (unrestricted net position of \$3,454,668) may be used to meet the government's ongoing obligation to citizens and creditors. Unrestricted net position increased \$2,577,794 from 2015.

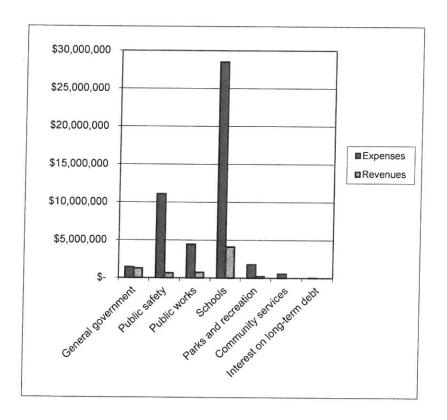

Analysis of the City's Operations. The following table provides a comparative summary of the City's operations for the years ended June 30, 2016 and 2015. Also, summary tables comparing 2016 with 2015 along with charts for 2016 are presented on pages 9 through 12 for Governmental expenses and program revenues and for Business-type expenses and program revenues. Governmental activities decreased the City's net position by \$988,350 in 2016 compared to a decrease of \$17,910,517 in 2015. Business-type activities increased the City's net position by \$296,704 in 2016 compared to a increase of \$4,096,758 in 2015.

The purpose of this bar chart is to present a comparison of expenses with their program revenues (i.e. revenues generated by the function) by function. The difference in the bars represents the amount of expenses being funded by tax revenues. The Table presents the actual amounts that support the Chart.

FINANCIAL ANALYSIS OF THE GOVERNMENTS FUNDS

Governmental funds. The focus of the City of Dyersburg's governmental funds is to provide information on nearterm inflows, outflows, and balances of spendable resources. Such information is useful in assessing the City's financing requirements. In particular, unassigned fund balance may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

At the end of the current fiscal year, the City of Dyersburg governmental funds reported combined ending fund balances of \$7,763,075, an increase of \$896,270 in comparison with the prior year. Approximately \$1,611,949 or approximately 21% of the fund balance represents unassigned fund balance, which is available for spending at the City's discretion. The remainder of the fund balance is either non-spendable (\$77,974), restricted (\$6,022,659) or committed (\$50,493).

In the general fund, the City budgeted for an increase in the fund balance of \$8,500. Actual revenues were \$136,857 over budgeted revenues and actual expenditures were \$1,574,387 under budgeted expenditures. Net transfers and other financing sources (uses) of \$2,800,982 resulted in the fund balance increasing \$1,000,869 for fiscal year 2016. School fund balance decreased \$482,065.

Proprietary funds. The City's proprietary fund statements provide the same type of information found in the government-wide financial statements, but in more detail.

Unrestricted net position of the respective proprietary funds are \$8,811,322 in Gas, (\$3,547,147) in Water and Sewer, (\$82,056) in Solid Waste Management, and \$9,226,290 in the Electric System. The Gas fund had a decrease in net position of \$262,030, Electric System net position increased \$311,364, Water and Sewer fund net position increased \$549,431 and the Solid Waste Management fund net position decreased \$242,678.

CAPITAL ASSETS

The City of Dyersburg's investment in capital assets for its governmental and business-type activities as of June 30, 2016, was \$116,583,675 (net of accumulated depreciation), a decrease of \$4,039,072 or 3.3% from 2015. The decrease is the result of net additions to capital assets of \$3,527,851 (a \$1,025,304 increase for Governmental activities and a \$2,502,547 increase for Business-type activities) net of depreciation of capital assets of \$7,566,923 (\$4,031,950 for Governmental activities and \$3,534,973 for Business-type activities). The investment in capital assets includes land, buildings and systems, improvements other than buildings, machinery and equipment, infrastructure and construction in progress.

Major capital asset events during the current fiscal year included the following (as rounded to the nearest hundred):

Governmental Funds

Additional information on the City of Dyersburg's capital assets can be found in Footnote IV. D. on pages 48-49 of this report.

DEBT ADMINISTRATION

At June 30, 2016, the City of Dyersburg had total bonded debt and notes payable of \$26,384,367. Of this amount, \$13,502,197 comprises bonded debt backed by the full faith and credit of the government and \$2,040,000 represents bonds secured by electric revenues. The notes payable of \$10,842,170 pertains to the general fund (\$5,210,850) and schools (\$5,631,320).

Total debt decreased \$2,502,853 or 8.7% from June 30, 2015 to June 30, 2016 as a result of new debt issued and payments made during the year.

Outstanding Debt at Year End Bonds and Notes Payable

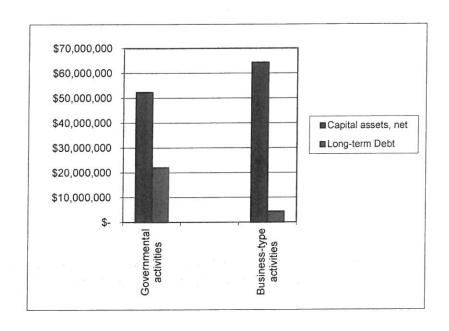

The City's long-term debt at June 30, 2016 and 2015 is summarized below:

	2		2016					2015	
	G	overnmental Activities	siness-type Activities	·	Total	G	overnmental Activities	siness-type Activities	Total
Notes Payable General Obligation Bonds Revenue Bonds	\$	10,842,170 11,212,197	\$ 2,290,000 2,040,000	\$	10,842,170 13,502,197 2,040,000	\$	11,775,324 11,496,896	\$ 2,990,000 2,625,000	\$ 11,775,324 14,486,896 2,625,000
	\$	22,054,367	\$ 4,330,000	\$	26,384,367	\$	23,272,220	\$ 5,615,000	\$ 28,887,220

The City's Bonds are insured thus holding an A credit rating from Standard and Poors and an A2 rating from Moody's.

Additional information on the City of Dyersburg's long term-debt and debt changes for the year can be found in Footnote IV. F. on pages 50-52 of this report.

ECONOMIC FACTORS AND NEXT YEAR'S BUDGETS AND RATES

The unemployment rate of Dyer County is 6.2%. This compares unfavorably to the state's average unemployment rate of 4.1% and the national average of 3.4%.

Inflationary trends in the region compare favorably to national indices.

As a result of the economic condition in the area, the City has made a concerted effort to limit appropriations to only those items truly necessary.

The property tax rate remained at \$2.37 for the 2016-2017 fiscal year.

User rates remained the same for Water, Sewer and Gas services for fiscal year 2016-2017.

User rates remained the same for Refuse Collection for fiscal year 2016-2017.

REQUEST FOR INFORMATION

The financial report is designed to provide our citizens, customers, investors and creditors with general overview of the City's finances. If you have questions about this report or need any additional information, contact the Treasurer's Office at P.O. Box 1358, Dyersburg, TN 38025-1358 or call (731) 288-7609.

CITY OF DYERSBURG, TENNESSEE RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES, AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES FOR THE FISCAL YEAR ENDED JUNE 30, 2016

Amounts reported for governmental activities in the statement of activities (page 20) are different because:

Net change in fund balances - total governmental funds (page 23)	\$	896,270
Proceeds from the sale of bonds and capital lease acquisitions are not reported as revenue in the statement of activities		(847,484)
Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which capital outlay exceeded depreciation expense.		(2,816,659)
Accrual for post employment benefits.		(191,241)
Pension income in statement of activities and not reported as income in fund statements		124,640
Pension expense in statement of activities and not reported as an expense in		
fund statements		328,349
Pension expense shown in fund statements and not reported in government wide statements		(264,473)
The issuance of long-term debt (e.g., bonds, notes) and the refunding of long-term debt provides current financial resources to governmental funds, while the repayment of the principal of long-term debt consumes the current resources of governmental funds. Neither transaction, however, has any effect on net position. Also, governmental funds report the effect of premiums, discounts, and similar items when debt is first issued. This amount is the net effect of these differences in the treatment of long-term debt and related items.		2,065,338
The net expense of certain activities of internal service funds is reported with governmental activities.		(77,806)
The increase/decrease in the liability for compensated absences is not reported in governmental funds.	_	17,840
Change in net position of governmental activities (page 20)	\$	(765,226)

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Reporting Entity

The City of Dyersburg, TN (City) is a municipal corporation governed by an elected mayor and eight-member Board of Aldermen. The accompanying financial statements include the accounts of all City operations. Based on the criteria of Section 2100 of GASB's Codification of *Governmental Accounting and Financial Reporting Standards*, the City has no component units.

B. Government-wide and Fund Financial Statements

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the nonfiduciary activities of the primary government. For the most part, the effect of interfund activity has been removed from these statements. *Governmental activities*, which normally are supported by taxes and intergovernmental revenues, are reported separately from *business-type activities*, which rely to a significant extent on fees and charges for support.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. *Direct expenses* are those that are clearly identifiable with a specific function or segment. *Program revenues* include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as *general revenues*.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements.

C. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the proprietary fund and fiduciary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the current *financial resources measurement* focus and the *modified accrual basis of accounting*. Revenues are recognized as soon as they are both *measurable and available*. Revenues are considered to be *available* when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the City considers revenues to be available if they are collected within sixty (60) days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

Property taxes, franchise taxes, licenses, and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. All other revenue items are considered to be measurable and available only when cash is received by the government.

The government reports the following major governmental funds:

The *general fund* is the government's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.

The **school fund** accounts for the activities of the Dyersburg City Schools. The City provides elementary through secondary educational opportunities for its residents.

The government reports the following major proprietary funds:

The water and sewer fund accounts for the activities of the City's Water and Sewer system. The City operates the sewage treatment plant, sewage pumping stations and collection systems, and the water distribution and purification system.

The natural gas fund accounts for the activities of the City's natural gas distribution system.

The **solid waste management fund** accounts for the activities of the City's landfill and the collection system of residential, commercial, and industrial garbage.

The electric fund accounts for the activities of the City's electric distribution operations.

Additionally, the government reports the following fund types:

The *internal service funds* account for data processing, utility billing, utility collection, and communication services provided to other funds of the City on a cost reimbursement basis.

Private-sector standards of accounting and financial reporting issued prior to December 1, 1989, generally are followed in both the government-wide and proprietary fund financial statements to the extent that those standards do not conflict with or contradict guidance of the Government Accounting Standards Board. Governments also have the option of following subsequent private-sector guidance for their business-type activities and enterprise funds, subject to this same limitation. The government has elected not to follow subsequent private-sector guidance.

As a general rule the effect of interfund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule are payments-in-lieu of taxes and other charges between the government's enterprise funds and various other functions of the government. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned.

Amounts reported as *program revenues* include 1) charges to customers for goods and services provided, 2) operating grants and contributions, and 3) capital grants and contributions, including special assessments. Internally dedicated resources are reported as *general revenues* rather than as program revenues. Likewise, general revenues include all taxes.

Proprietary funds distinguish *operating* revenues and expenses from *nonoperating* items. Operating revenues and expenses generally result from providing services and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the enterprise funds and of the City's internal service funds are charges to customers for sales and services. The enterprise funds also recognize as operating revenue the portion of fees charged that are intended to recover the cost of connecting new customers to the system. Operating expenses for enterprise funds and internal service funds include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

When both restricted and unrestricted resources are available for use, it is the government's policy to use restricted resources first, then unrestricted resources as they are needed.

D. Impact of Recently Issued Accounting Pronouncements

In February 2015, the GASB issued Statement No. 72 - Fair Value Measurement and Application, effective for fiscal years beginning after June 15, 2015, provides guidance for determining a fair value measurement for financial reporting purposes. This Statement also provides guidance for applying fair value to certain investments and disclosures related to all fair value measurements. The requirements of this Statement will enhance comparability of financial statements among governments by requiring measurement of certain assets and liabilities at fair value using a consistent and more detailed definition of fair value and accepted valuation techniques. This Statement also will enhance fair value application guidance and related disclosures in order to provide information to financial statement users about the impact of fair value measurements on a government's financial position. This Statement did not have an impact on the City in the current year. In June 2015, the GASB issued Statement No. 73 - Accounting and Financial Reporting for Pensions and Related Assets That Are Not within the Scope of GASB Statement 68, and Amendments to Certain Provisions of GASB Statements 67 and 68, effective for financial statements for periods beginning after June 15, 2015. This Statement carries all of the requirements of Statement 68 to all pensions. It also requires that information similar to that required by Statement 68 be included in notes to financial statements and required supplementary information by employers. This Statement did not have an effect on the City due to the City's pension plans falling under GASB Statement No. 68. In August 2015, the GASB issued Statement No. 77 - Tax Abatement Disclosures, effective for reporting periods beginning after December 15, 2015. The objective of this Statement was to provide financial statement users with information about certain limitations on a government's ability to raise resources. This includes limitations on revenue-raising capacity resulting from government programs that use tax abatements to induce behavior by individuals and entities that is beneficial to the government or its citizens. Tax abatements are widely used by state and local governments, particularly to encourage economic development. For financial reporting purposes, this Statement defines a tax abatement as resulting from an agreement between a government and an individual or entity in which the government promises to forgo tax revenues and the individual or entity promises to subsequently take a specific action that contributes to economic development or otherwise benefits the government or its citizens. This Statement requires governments that enter into tax abatement agreements to disclose the following information about the agreements: 1) Brief descriptive information, such as the tax being abated, the authority under which tax abatements are provided, eligibility criteria, the mechanism by which taxes are abated, provisions for recapturing abated taxes, and the types of commitments made by tax abatement recipients, 2) The gross dollar amount of taxes abated during the period, and 3) Commitments made by a government, other than to abate taxes, as part of a tax abatement agreement. Management is currently evaluating the impact that this Statement will have on the City's financial statements.

E. Assets, Liabilities, and Net Assets or Equity

1. Deposits and Investments

The City's cash and cash equivalents are considered to be cash on hand, demand deposits, and short-term investments with original maturities of three (3) months or less from the date of acquisition.

The City is allowed to invest in (1) obligations of the United States or its agencies and instrumentalities; (2) direct obligations of the State of Tennessee or its agencies; (3) other obligations, the principal of and interest on which are unconditionally guaranteed or insured by the State of Tennessee or the United States; (4) certificates of deposits issued by state and national banks domiciled in Tennessee that are guaranteed or insured by the Federal Deposit Insurance Corporation or its successor, or secured by obligations mentioned above; and (5) fully collateralized direct repurchase agreements having a defined termination date.

Investments for the City are reported at fair value.

2. Receivables and Payables

During the course of operations, numerous transactions occur between individual funds that may result in amounts owed between funds. These amounts are classified as Due to/from other funds.

All trade and property tax receivables are shown net of an allowance for uncollectible accounts. The allowances for uncollectible accounts have been established at an amount considered sufficient by the City to offset losses from customers nonpayment.

The City's property tax schedule as defined by the City Charter is as follows: Property taxes are levied as of September 1 on the property values assessed as of the prior January 1. Taxes are due September 1 through December 31 and are delinquent on the following January 1. Tax bills are mailed on September 1. Tax liens are automatic on January 1 each year and continue until such taxes and any penalty, interest or other charges accruing thereon are paid. Assessed values are established by the County Tax Assessor at 25% of appraised market value for residential real property, 40% for commercial real property, 55% for public utilities, and 30% for business personal property. A complete reappraisal of all property is required every six (6) years with an update after the third year. A revaluation was completed in 2014. The City's tax rate applicable to 2016 was \$2.37 on each \$100 of tax valuation.

3. Inventories and Prepaid Items

The inventory of materials and supplies of the proprietary funds are valued at the lower of market or average cost. The inventory of the Dyersburg City Schools is valued at cost, using the first-in/first-out (FIFO) method. Inventories are recorded as expenditures when consumed rather than when purchased.

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in both the government-wide and fund financial statements.

4. Capital assets, depreciation, and amortization

Capital assets, which include property, plant, equipment, and infrastructure assets (e.g., roads, bridges, sidewalks, and similar items), are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capital assets are defined by the City as assets with an initial, individual cost of more than \$5,000 (amount not rounded) and an estimated useful life in excess of two (2) years. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation.

The costs of normal maintenance and repairs that do not add to the value of the assets or materially extend assets lives are not capitalized.

Major outlays for capital assets and improvements are capitalized as projects are constructed. Interest incurred during the construction phase of capital assets of business-type activities is included as part of the capitalized value of the assets constructed. However, the Dyersburg Electric System does not capitalize construction period interest into the cost of fixed assets because the borrowings are not related to specific projects and are incurred for general repairs, maintenance, and plant expansion.

Property, plant, and equipment of the primary government is depreciated using the straight-line method over the following estimated useful lives:

Assets	Years
Buildings	50
Building improvements	20
Public domain infrastructure	50
System infrastructure	30
Vehicles	5
Office equipment	5
Computer equipment	5

The City policy for amortization of deferred charges and of acquisition cost of utility customers is to amortize these costs over their estimated benefit period. Amortization periods range from five (5) to twelve (12) years.

5. Compensated Absences

It is the City's policy to permit employees to accumulate earned but unused vacation and sick pay benefits. All vacation and sick pay is accrued when incurred in the government-wide, proprietary, and fiduciary fund financial statements. Governmental funds report only matured compensated absences payable to currently terminating employees and are included in wages and benefits payable. Unpaid compensated absences for proprietary fund types are recorded as expenses and liabilities in those funds as the benefits accrue to employees.

6. Long-Term Obligations

In the government-wide financial statements, and proprietary fund types in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund type statement of net position. Bond premiums and discounts are deferred and amortized over the life of the bonds using the effective interest method. Bonds payable are reported net of the applicable bond premium or discount.

7. Fund Equity

GASB 54 requires the fund balance amounts to be properly reported within one of the following fund balance categories:

Nonspendable: This classification includes amounts that cannot be spent because they are either (a) not in spendable form or (b) legally or contractually required to be maintained intact. The "not in spendable form" criterion includes items that are not expected to be converted to cash, for example: inventories, prepaid amounts, and long term notes receivable.

Restricted: This classification includes amounts for which constraints have been placed on the use of the resources that are either (a) externally imposed by creditors (such as through debt covenants), grantors, contributors, or laws or regulations of other governments or (b) imposed by law through constitutional provisions or enabling legislation.

Committed: This classification includes amounts that can only be used for specific purposes pursuant to constraints imposed by formal action of the Board of Mayor and Aldermen (the City's highest level of decision-making authority) either by ordinance or resolution. These amounts cannot be used for any other purpose unless the Board removes or changes the specified use by taking the same type of action that was employed when the funds were initially committed.

Assigned: This classification includes spendable amounts that are reported in governmental funds other than the General Fund, that are neither restricted nor committed, and amounts in the General Fund that are intended to be used for a specific purpose in accordance with the provisions of GASB Statement 54. The intent of an assigned fund balance should be expressed by either the Board of Mayor and Aldermen, or a subordinate high-level body, such as the Finance Committee, that has the authority to assign amounts to be used for specific purposes.

Unassigned: This classification is the residual fund balance for the General Fund. It also represents the fund balance that has not been assigned to other funds and that has not been restricted, committed, or assigned to specific purposes within the General Fund.

In the government-wide financial statements, governmental funds report reservations of fund balance for amounts that are not available for appropriation or are legally restricted by outside parties for use for a specific purpose. Designations of fund balance represent tentative management plans that are subject to change. Governmental funds also report fund balance amounts representing funds invested in capital assets net of related debt and unrestricted funds.

When fund balance resources are available for a specific purpose in multiple classifications, the Board would use the most restrictive funds first in the following order: restricted, committed, assigned, and unassigned as they are needed. However, it reserves the right to selectively spend unassigned resources first and to defer the use of the other classified funds.

8. Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that effect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

9. Vacation and Sick Leave

The City has established various vacation and sick leave policies for different segments of employees.

- 1) Dyersburg School System The School System provides one day of vacation for each month of service for professional employees. Any unused vacation is paid at year end to the employee. Professional employees receive one day of sick leave for each month of service. Any sick leave unused is not paid, but is used to increase retirement benefits. Nonprofessional employees receive .75 days per month or the equivalent of 9 days per year to be used as sick leave or vacation. The non-professional employees can accumulate up to a maximum of 15 days. The days accumulated in excess of the maximum are to be paid to the employees as .5 days pay for days accumulated in excess of the maximum allowed.
- 2) Dyersburg Electric System Electric System employees accrue vacation days under the following terms:

Employment Term	Days Earned
1 month to 10 years	1 day per month
11 years to 15 years	1.25 days per month
16 years to 20 years	1.50 days per month
Over 20 years	1.75 days per month

A maximum of 252 hours may be carried forward into the next calendar year. Sick leave accumulates at the rate of one day for each full calendar month of employment service. Unused sick leave days may accumulate from year to year up to a maximum of ninety days.

3) Firefighters accrue vacation days under the following terms:

Employment Term	Days Earned
1 to 2 years	3 shift days (1 week)
2 to 10 years	5 shift days (2 weeks)
10 to 20 years	8 shift days (3 weeks)
Over 20 years	10 shift days (4 weeks)

Vacation leave shall begin to accrue at the end of the first full month of employment, but may be granted only after the probation period is completed. Vacation time not used during the anniversary year may be carried forward to the following anniversary year subject to the approval of the department head. Sick leave with pay shall be granted to all full-time employees at the rate of one-half shift day for each completed month of service and may be accrued to a maximum of forty-five (45) days. Employees shall accrue sick leave from their employment date. No payment will be made for accrued sick leave upon separation, except for those employees that have accumulated twenty years of service with the City and that were employed prior to March 18, 1991.

4) Other City employees - All other City employees are allowed paid vacations of five days after one year of service, ten days after two years, fifteen days after ten years, and twenty days after twenty years. Unused vacations may be accumulated to a maximum of three hundred sixty (360) hours and carried forward to the following year. Sick leave with pay shall be granted all full-time employees at the rate of one working day for each completed month of service and may be accrued to a maximum of ninety (90) days. Employees shall accrue sick leave from their employment date. No payment will be made for accrued sick leave upon separation, except for those employees that have accumulated twenty years of service with the City and that were employed prior to March 18, 1991.

10. Deferred Outflows/Inflows of Resources

In addition to assets, the statement of financial position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense) until then. The City presently has deferred outflows of resources related to pensions.

In addition to liabilities, the statement of financial position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The City has three items that qualify for reporting in this category. Unavailable revenue is reported as deferred inflows of resources in the fund financial statements for property taxes and confiscated funds that are not collectible in the current fiscal period or within sixty days of the end of the current fiscal period. Unavailable revenues are reported in the government wide financial statements for property taxes that are levied but not due until September of the next fiscal year. There are also deferred inflows related to pensions.

11. Utility Pole Rental

The Electric System contracts with other utilities to share poles for lines. These contracts are renewed on an annual basis. Pole rent expense for the year ended June 30, 2016, was \$17,323.

12 Pensions

Dyersburg Electric System

The System has a defined benefit pension plan covering substantially all of its employees. Payments made after the measurement date for the defined benefit plan are deferred in the financial statements. Investments are reported at fair value. Employees hired or rehired after December 31, 2012 are mostly participants in the defined contribution plan. Employer contributions to this plan are expensed as incurred.

Dyersburg City Schools

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Teacher Legacy Pension Plan and Teacher Retirement Plan in the Tennessee Consolidated Retirement System (TCRS) and additions to/deductions from the plan's fiduciary net position have been determined on the same basis as they are reported by the TCRS. For this purpose, benefits (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms of the Teacher Legacy Pension Plan. Investments are reported at fair value.

City of Dyersburg

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the City's participation in their single employer defined benefit pension plan, and additions to/deductions from the City's fiduciary net position have been determined on the same basis as they are reported by the retirement plan. For this purpose, benefits (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms of the retirement plan. Investments are reported at fair value.

13 On Behalf Payments for Post Retirement Insurance Benefits

Dyersburg City Schools

The Board recognizes as revenues and expenses contributions made by the State of Tennessee to the Teacher Group Plan and the Medicare Plan on behalf of the Board's employees. For the year ended June 30, 2016, the State made contributions of \$222,000.

II. Reconciliation of Government-Wide and Fund Financial Statement

A. Explanation of certain differences between the governmental fund balance sheet and the government-wide statement of net assets

The governmental fund balance sheet includes a reconciliation between fund balance - total governmental funds and net assets - governmental activities as reported in the government-wide statement of net assets. One element of that reconciliation explains that "long-term liabilities, including bonds payable, are not due and payable in the current period and therefore are not reported in the funds." The details of this \$24,193,883 difference are as follows:

Bonds payable	\$ 11,212,197
Notes payable	10,842,170
Compensated absences	 2,139,516
Net adjustment to reduce fund balance - total governmental funds to arrive at net assets - governmental activities	\$ 24,193,883

B. Explanation of certain differences between the governmental fund statement of revenues, expenditures, and changes in fund balances and the government-wide statement of activities

The governmental fund statement of revenues, expenditures, and changes in fund balances includes a reconciliation between net changes in fund balances - total governmental funds and changes in net assets of governmental activities as reported in the government-wide statement of activities. One element of that reconciliation explains that "Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of those assets is allocated over the estimated useful lives and reported as depreciation expense." The details of this (\$2,816,659) difference are as follows:

Capital outlay	\$ 1,241,471
Less depreciation expense	 (4,058,130)
Net adjustment to decrease net changes in fund balances - total governmental funds to arrive at changes in net assets	
of governmental activities	\$ (2,816,659)

III. Stewardship, Compliance, and Accountability

A. Budgetary Information

Annual budgets are adopted on a basis consistent with generally accepted accounting principles for all governmental funds. All annual appropriations lapse the fiscal year end.

The appropriated budget is prepared by fund, function, and department and approved by a budget ordinance. No budgeted appropriation may be exceeded without an amendment of the budget ordinance. The legal level of budgetary control (i.e., the level at which expenditures may not legally exceed appropriations) is the fund level.

For the year ended June 30, 2016 expenditures exceeded appropriations in the TIP Fund and the General Purpose School Fund.

IV. Detail Notes on All Funds

A. Deposits and Investments

Cash and certificates of deposit are carried at cost which approximates market value.

The City is mandated by law to require that the financial institutions in which they maintain deposits pledge securities to collateralize deposits which are in excess of the amount covered by federal insurance. At June 30, 2016, the City's bank deposits were entirely insured with FDIC Insurance or through the state bank collateral pool.

At year end, the government's investment balances were as follows:

	 nvestments	Funds
Time Deposits	\$ 10,000	\$ -
Certificates of Deposit	9,233,199	
U. S. Agencies and Instrumentalities	-	 1,475,472
Total Securities	9,243,199	1,475,472
Local Government Investment Pool	1,049,475	-
Total Investments	\$ 10,292,674	\$ 1,475,472

At June 30, 2016 the time deposits and certificates of deposit contained a weighted average maturity of between 6 and 36 months and the fair value is noted as the carrying amount reported. The U.S. Agencies and Instrumentalities contained a weighted average maturity of 60 months and the fair value is noted as the carrying amount reported.

Local Government Investment Pool investments are not categorized, in accordance with GASB No. 3, because they are not evidenced by securities that exist in physical or book entry form.

The State Treasurer operates the State Pooled Investment Fund of which the Local Government Investment Pool is a part. The funds are invested by the State at various financial institutions in the State and in other approved investments. The funds may be liquidated as needed.

The State Pooled Investment Fund (SPIF) operates in a manner consistent with the SEC's Rule 2a7 of the Investment Company Act of 1940. Therefore, the SPIF uses amortized cost accounting measures to report investments and share prices. Accordingly, the fair value of the position in SPIF is the same as the value of SPIF shares.

B. Receivables

Receivables as of year end for the City's individual major funds and nonmajor, internal service, and fiduciary funds in the aggregate, including the applicable allowances for uncollectible accounts, are as follows:

Governmental Funds:

				Nonmajor		
 General		School		Funds	_	Total
\$ 87,694	\$	465,400	\$	-	\$	553,094

Governmental funds report deferred revenue in connection with receivables for revenues that are not considered to be available to liquidate liabilities of the current period. Governmental funds also defer revenue recognition in connection with resources that have been received, but not yet earned. At the end of the current fiscal year, deferred revenue reported in the governmental funds was as follows:

	 Inavailable
Property taxes receivable (general fund) Confiscated funds (TIP fund)	\$ 7,941,517 12,809
Total unavailable revenue for governmental funds	\$ 7,954,326

C. Notes Receivable

During the year ended June 30, 1996, the City sold 30 acres of industrial park land to the Industrial Development Board of Dyer County. The Board executed a non-interest bearing note payable in favor of the City in the amount of \$240,000 due in full October 1, 2015. The principal balance of the note was retired during the fiscal year.

By prior agreement, the City agreed to reimburse the County of Dyer for its investment in real estate of the Industrial Development Park as parcels are sold and the sales price collected. Accordingly, a liability has been recorded in the Community Development Fund in the amount of \$30,133.

D. Capital Assets

Capital asset activity for the year ended June 30, 2016 was as follows:

Primary Government

Governmental activities: Capital assets not being depreciated: Land \$ 6,547,196 \$ 15,152 \$ (156,120) \$ 6	,406,228 156,500

E. Interfund Receivables, Payables, and Transfers

The composition of interfund balances at June 30, 2016, is as follows:

Receivable Fund	Payable Fund	Amount
General	Enterprise Nonmajor governmental Internal Service	\$ 69,784 385,353 45,578
Enterprise	Nonmajor governmental Internal Service Enterprise	863,616 922,209 350,581
Nonmajor governmental	General	507,778
Internal Service	General Internal Service Nonmajor governmental	21,000 12,974 49,094
Total	. termisjer gerorimental	\$ 3,227,967

The outstanding balances between funds result mainly from the time lag between the dates that (1) interfund goods and services are provided or reimbursable expenditures occur, (2) transactions are recorded in the accounting system, and (3) payments between funds are made.

Interfund transfers for the year ending June 30, 2016:

Transfer To	Transfer From	Amount
General	Gas (Tax Equivalents) Water and Sewer (Tax Equivalents) Electric (Tax Equivalents) Cemetery Trust (Per Trust Agreement)	\$ 250,200 697,800 1,122,540 34,259
Community Development	General (Industrial Development)	81,725
Cemetery Trust	General (Per Trust Agreement)	43,750
Capital Projects	General (Capital Projects)	25,826
School General Purpose	Debt Service (School Debt)	1,657,386
School Debt Service Total	School General Purpose (School Debt)	\$ 4,163,240

Interfund transfers occur in the normal course of business activities.

F. Long-Term Debt

1. General Obligation bonds

General obligation bonds are direct obligations and pledge the full faith and credit of the government. General obligation bonds currently outstanding are as follows:

\$8,365,000 General Obligation Water and Sewer Refunding Bonds, Series 2009 dated April 28, 2009, due in annual installments at 3.00-4.00% interest, secured by revenues of the City.	\$ 2,290,000
\$2,960,000 General Obligation Qualified School Construction Bonds, Series 2009 dated December 17, 2009, due in monthly installments at 1.515% interest, secured by revenues of the City.	1,867,197
\$9,600,000 General Obligation School Bonds, Series 2013 dated August 16, 2013, due in annual installments at 2.00-4.10% interest, secured by revenues of the City.	 9,345,000
Total General Obligation Bonds Payable	\$ 13,502,197

Annual debt service requirements to maturity for general obligation bonds are as follows:

Year Ending	Governmental Activities			Business-type Activities				
June 30,	Principal		Interest		Principal		Interest	
2017	\$ 284,699	\$	378,762	\$	735,000	\$	76,900	
2018	284,699		376,762		770,000		46,800	
2019	284,699		374,762		785,000		15,700	
2020	324,699		372,762					
2021	329,699		369,682		-		¥s	
2022-2026	3,523,702		1,728,294		-		-0	
2027-2031	4,230,000		913,826		-		-	
2032-2036	 1,950,000		122,178				-	
Totals	\$ 11,212,197	\$	4,637,028	\$	2,290,000	\$	139,400	

2. Revenue Bonds

The City also issues bonds where the City pledges income derived from the acquired or constructed assets to pay debt service. Revenue bonds outstanding at year end are as follows:

\$3,800,000 Electric System Revenue Refunding Bonds, Series 2005 dated
March 22, 2005, due in annual installments at 3.10-4.10% interest, secured by
revenues of the System \$835,000

\$2,000,000 Electric System Revenue Refunding Bonds, Series 2007 dated
March 26, 2007, due in annual installments at 3.70 - 4.00% interest, secured by
revenues of the System \$1,205,000

Total Revenue Bonds Payable \$2,040,000

Revenue bond debt service requirements to maturity are as follows:

Year Ending June 30,	 Principal	Interest				
2017	\$ 380,000	\$	59,001			
2018	370,000		49,995			
2019	365,000		41,000			
2020	370,000		31,700			
2021	180,000		22,200			
2022-2026	 375,000		22,600			
Totals	\$ 2,040,000	\$	226,496			

3. Notes Payable

The City has executed notes payable for the construction or acquisition of major capital facilities. Notes outstanding at year end are as follows:

Governmental activities

\$10,000,000 Tennessee Municipal Bond Fund Variable Rate Loan Program, dated September 19, 2000, secured by revenues of the City	\$	5,298,000
\$2,180,000 Capital Outlay Refunding Notes dated February 20, 2015, secured by revenues of the	e (1,645,000
\$4,500,000 Tennessee Municipal Bond Fund Variable Rate Loan Program, dated September 29, 2011, secured by revenues of the City		2,824,000
\$500,000 Energy Efficient Schools Initiative Loan Agreement, dated April 9, 2012		333,320
\$1,500,000 Tennessee Municipal Bond Fund Variable Rate Loan Program, dated February 18, 2016, secured by revenues of the City		530,580
\$316,904 Capital Lease secured by revenues of the City		211,270
Total notes payable - Governmental activities	\$	10,842,170

Annual debt service requirements to maturity for notes payable are as follows:

8-	Principal	Interest			
\$	1,831,639	\$	276,595		
	1,943,219		253,701		
	1,873,004		212,724

H. Industrial Park Property

The City of Dyersburg has purchased several parcels of industrial property in an equal partnership with the County of Dyer, Tennessee. When the property is sold, the County of Dyer receives one-half of the net proceeds from the sales after allowance has been made for reimbursement to the City for costs of developing the property, if any. At June 30, 2016, approximately 308 acres of undeveloped industrial park property is owned jointly by these two governmental bodies.

I. Closure and Postclosure Care Costs

State and Federal laws and regulations require that the City place a final cover on its landfill when closed and perform certain maintenance and monitoring functions at the landfill site for thirty years after closure. In addition to operating expenses related to current activities of the landfill, an expense provision and related liability are being recognized based on the future closure and postclosure care costs that will be incurred near or after the date the landfill no longer accepts waste. At June 30, 2016, the estimated remaining useful life of the landfill was 59 years.

The recognition of the landfill closure and postclosure care costs is based on the amount of the landfill used during the year. The estimated liability for landfill closure and postclosure care costs has a balance of \$1,357,000 as of June 30, 2016, which is based on 23.6% usage (filled) of the landfill. It is estimated that an additional \$4,381,743 will be recognized as closure and postclosure care expenses between the date of the balance sheet and the date the landfill is expected to be filled to capacity. The estimated total current cost of the landfill closure and postclosure care (\$5,738,743) is based on the amount that would be paid if all equipment, facilities, and services required to close, monitor, and maintain the landfill were acquired as of June 30, 2016. However, the actual cost of closure and postclosure care may be higher due to inflation, changes in technology, or changes in landfill laws and regulations.

The City is required by state and Federal laws and regulations to make annual contributions to finance closure and postclosure care. At June 30, 2016, the City has \$314,222 on deposit for the funding of this liability. The City has executed contracts in lieu of performance bonds with the State of Tennessee in the sum of \$5,981,336 which states that the City shall properly operate the solid waste facility and perform closure of the facility in accordance with all requirements of the permit and the closure/postclosure plan pursuant to all applicable laws and regulations. Failure of the City to perform would entitle the State of Tennessee to collect any state funds disbursed to the City for the cost of any violations.

Once the City funds the closure/postclosure liability, it would be anticipated that future inflation costs would be financed in part from earnings on investments held by the trustee. The remaining portion of anticipated future inflation costs (including inadequate earnings on investments, if any) and additional costs that might arise from changes in postclosure requirements (due to changes in technology or more rigorous environmental regulations, for example) may need to be covered by charges to future landfill users, taxpayers, or both.

V. Other Information

A. Risk Management

The City is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. The City maintains commercial insurance coverage covering each of those risks of loss. Management believes such coverage is sufficient to preclude any significant uninsured losses to the City. Settled claims have not exceeded this commercial coverage in any of the past three fiscal years.

Dyersburg City Schools

During the year ended June 30, 2016, the School obtained insurance from the Tennessee School Board Liability Trust (TSBLT), which is a public entity risk pool established to provide insurance coverage to local School boards in Tennessee. The Board pays an annual premium to TSBLT for insurance. The creation of TSBLT provides for it to be self-sustaining through member premiums. The TSBLT reinsures through commercial insurance companies for claims in excess of \$100,000 for each insured event.

It is the policy of the School Board to purchase commercial insurance for the risks of losses to which it is exposed, other than those risks noted above. Settled claims have not exceeded this commercial coverage in any of the past three fiscal years.

Dyersburg Electric System

The Electric System is exposed to various risks of loss related to torts; theft of, damage to and destruction of assets, errors and omissions and natural disasters for which the System carries commercial insurance. There have been no significant reductions in coverage from the prior year and settlements have not exceeded coverage in the past three years.

Other City Segments

The City through the City of Dyersburg Healthcare Network provides City employees with self-funded healthcare coverage. The City entered an agreement with Underwriters Safety & Claims, Inc. for claims administration and payment. Claims in excess of a self-insured aggregate limit of \$3,661,468 and specific underlying coverage of \$100,000 per employee was covered through third party insurance policies. Revenues are recognized from payroll deductions for employee dependent coverage and from City contributions for employee coverage. There were no reductions in insurance coverage, and claims paid in excess of self-insured limits have been reimbursed to the City or recorded as a receivable at June 30, 2016.

The City is exposed to various risks of loss related to torts, theft of, damage to and destruction of assets, errors and omissions and natural disasters for which the City carries commercial insurance. There have been no significant reductions in coverage from the prior year and settlements have not exceeded coverage in the past three years.

B. Concentration of Credit Risk

The City bills local property owners for property taxes and customers of the Enterprise Funds for utility services. At June 30, 2016, these property owners and customers are indebted to the City as noted on the Balance Sheet and Statement of Net Position of the General and Proprietary Funds. The majority of the property owners and customers are local businesses or individuals. The property is subject to foreclosure in the event of non-payment after certain legal requirements are met. The utility services are sold to the customers without requiring any collateral although deposits are required in certain situations. The ability of customers to pay is dependent upon the economic conditions of the area.

C. Pending or Threatened Litigation

At June 30, 2016 Dyersburg Electric had no litigation or pending litigation.

At June 30, 2016 Dyersburg City Schools had no litigation or pending litigation.

At June 30, 2016 the City of Dyersburg is a defendant in various lawsuits. Although the outcome of these lawsuits is not presently determinable, it is the opinion of the City's counsel that resolution of these matters will not have a material adverse effect on the financial condition of the City.

D. Contingent Liabilities

Amounts received or receivable from grant agencies are subject to audit and adjustment by grantor agencies, principally the federal government. Any disallowed claims, including amounts already collected, may constitute a liability of the applicable funds. The amount, if any, of expenditures that may be disallowed by the grantor cannot be determined at this time, although the City expects such amounts, if any, to be immaterial.

E. Employee Retirement Systems and Pension Plans

Dyersburg City Schools

1. Teachers Legacy Plan

Plan Description. Teachers with membership in the Tennessee Consolidated Retirement System (TCRS) before July 1, 2014 of Dyersburg City Schools are provided with pensions through the Teacher Legacy Pension Plan, a cost sharing multiple-employer pension plan administered by the TCRS. The Teacher Legacy Pension Plan closed to new membership on June 30, 2014, but will continue providing benefits to existing members and retirees. Beginning July 1, 2014, the Teacher Retirement Plan became effective for teachers employed by Local Education Agencies (LEAs) after June 30, 2014. The Teacher Retirement Plan is a separate cost sharing, multiple-employer defined benefit plan. The TCRS was created by state statute under Tennessee Code Annotated Title 8, Chapters 34-37. The TCRS Board of Trustees is responsible for the proper operation and administration of all employer pension plans in the TCRS. The Tennessee Treasury Department, an agency in the legislative branch of state government, administers the plans of the TCRS. The TCRS issues a publicly available financial report that can be obtained at www.treasury.tn.gov/tcrs.

Benefits Provided. Tennessee Code Annotated Title 8, Chapters 34-37 establishes the benefit terms and can be amended only by the Tennessee General Assembly. Members of the Teacher Legacy Pension Plan are eligible to retire with an unreduced benefit at age 60 with 5 years of service credit or after 30 years of service credit regardless of age. Benefits are determined by a formula using the member's highest five consecutive year average compensation and the member's years of service credit. A reduced early retirement benefit is available at age 55 and vested. Members are vested with five years of service credit. Service related disability benefits are provided regardless of length of service. Five years of service is required for non-service related disability eligibility. The service related and non-service related disability benefits are determined in the same manner as a service retirement benefit but are reduced 10 percent and include projected service credits. A variety of death benefits are available under various eligibility criteria. member and beneficiary annuitants are entitled to automatic cost of living adjustments (COLAs) after retirement. A COLA is granted each July for annuitants retired prior to the 2nd of July of the previous year. The COLA is based on the change in the consumer price index (CPI) during the prior calendar year, capped at 3 percent, and applied to the current benefit. No COLA is granted if the change in the CPI is less than one-half percent. A one percent COLA is granted if the CPI change is between one-half percent and one percent. A member who leaves employment may withdraw their employee contributions, plus any accumulated interest. Under the Teacher Legacy Pension Plan, benefit terms and conditions, including COLA's, can be adjusted on a prospective basis. Moreover, there are defined cost controls and unfunded liability controls that provide for the adjustment of benefit terms and conditions on an automatic basis.

Contributions. Contributions for teachers are established in the statutes governing the TCRS and may only be changed by the Tennessee General Assembly. Teachers contribute 5 percent of salary. The Local Education Agencies (LEAs) make employer contributions at the rate set by the Board of Trustees as determined by an actuarial valuation. By law, employer contributions for the Teacher Legacy Pension Plan are required to be paid. The TCRS may intercept the state shared taxes of the sponsoring governmental entity of the LEA if the required employer contributions are not remitted. Employer contributions by Dyersburg City Schools for the year ended June 30, 2016 to the Teacher Legacy Pension Plan were \$966,175 which is 9.04 percent of covered payroll. The employer rate, when combined with members during the year, the cost of administration, as well as an amortized portion of any unfunded liability.

Pension Liabilities (Assets), Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

Pension Liabilities (Assets). At June 30, 2016, the Dyersburg City Schools reported a liability of \$119,875 for its proportionate share of net pension liability. The net pension liability was measured as of June 30, 2015, and the total pension liability used to calculate the net pension asset was determined by an actuarial valuation as of that date. Dyersburg City Schools' proportion of the net pension liability was based on Dyersburg City Schools' share of contributions to the pension plan relative to the contributions of all LEAs. At the June 30, 2015 measurement date, Dyersburg City Schools' proportion was 0.292639 percent. The proportion measured as of June 30, 2014 was 0.307025 percent.

Negative Pension Expense. For the year ended June 30, 2016, Dyersburg City Schools recognized negative pension expense of \$124,641.

Deferred Outflows of Resources and Deferred Inflows of Resources. For the year ended June 30, 2016, Dyersburg City Schools reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between expected and actual experience	\$ 96,205	\$ 1,865,871
Net difference between projected and actual earning on pension plan investments	2,164,566	2,938,516
Changes in proportion of Net Pension Liability (asset)	36,648	153,828
LEAs contributions subsequent to the measurement date of June 30, 2015	996,175	N/A
Total	\$ 3,263,594	\$ 4,958,216

Dyersburg City Schools employer contributions of \$966,175, reported as pension related deferred outflows of resources, subsequent to the measurement date, will be recognized as an increase in net position asset in the year ended June 30, 2017. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Years Ending June 30:

2017	\$	(815,733)
2018		(815,733)
2019		(815,733)
2020		163,772
2021		(377,369)
Thereafter		-

In the table above, positive amounts will increase pension expenses, while negative amounts will decrease pension expenses.

Actuarial assumptions. The total pension liability in the June 30, 2015 actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	3.0 percent
Salary Increases	Graded salary ranges from 8.97 percent to 3.71 percent based on age, including inflation, averaging 4.25 percent
Investment rate of return	7.5 percent, net of pension plan investment expenses, including inflation
Cost-of-Living Adjustment	2.5 Percent

Mortality rates are customized based on the June 30, 2012 actuarial experience study and included some adjustment for expected future improvement in life expectancy.

The actuarial assumptions used in the June 30, 2015 actuarial valuation were based on the results of an actuarial experience study performed for the period July 1, 2008 through June 30, 2012. The demographic assumptions were adjusted to more closely reflect actual and expected future experience.

The long-term expected rate of return on pension plan investments was established by the TCRS Board of Trustees in conjunction with the June 30, 2012 actuarial experience study by considering the following three techniques: (1) the 25-year historical return of the TCRS at June 30, 2012, (2) the historical market returns of asset classes from 1926 to 2012 using the TCRS investment policy asset allocation, and (3) capital market projections that were utilized as a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. Four sources of capital market projections were blended and utilized in the third technique. The blended capital market projection established the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding inflation of 3 percent. The target allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

Asset Class	Target _Allocation_	Long-Term Expected Real Rate of Return
U.S. Equity	33%	6.46%
Developed market international equity	17%	6.26%
Emerging market international equity	5%	6.40%
Private equity and strategic lending	8%	4.61%
U.S. fixed income	29%	0.98%
Real Estate	7%	4.73%
Short-term securities	1%	0.00%
Total	100%	

The long-term expected rate of return on pension plan investments was established by the TCRS Board of Trustees as 7.5 percent based on a blending of the three factors described above.

Discount Rate. The discount rate used to measure the total pension liability was 7.5 percent. The projection of cash flows used to determine the discount rate assumed that employee contributions will be made at the current rate and that contributions from LEAs will be made at the actuarially determined contribution rate pursuant to an actuarial valuation in accordance with the funding policy of the TCRS Board of Trustees and as required to be paid by the state statute. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make projected future benefit payments of current active and inactive members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the proportionate share of net pension liability (asset) to changes in the discount rate. The following presents Dyersburg City Schools' proportionate share of the net pension liability (asset) calculated using the discount rate of 7.5 percent, as well as what Dyersburg City Schools' proportionate share of the net pension liability (asset) would be if it were calculated using a discount rate that is 1 percentage-point lower (6.5 percent) or 1 percentage-point higher (8.5 percent) than the current rate:

	N	et Pension Liability
1% Decrease (6.5%)	\$	8,172,670
Current Discount Rate (7.5%)	\$	119,875
1% Increase (8.5%)	\$	(6,546,890)

Pension Plan Fiduciary Net Position. Detailed information about the pension plan's fiduciary net position is available in the separately issued TCRS financial report.

2. Teacher Retirement Plan (TCRS)

General Information about the Pension Plan

Plan Description. Teachers with membership in the Tennessee Consolidated Retirement System (TCRS) before July 1, 2014 of Dyersburg City Schools are provided with pensions through the Teacher Retirement Plan, a cost sharing multiple-employer pension plan administered by the TCRS. The Teacher Legacy Pension Plan closed to new membership on June 30, 2014, but will continue providing benefits to existing members and retirees. Beginning July 1, 2014, the Teacher Retirement Plan became effective for teachers employed by LEA's after June 30, 2014. The Teacher Retirement Plan is a cost sharing multiple-employer defined benefit pension plan. The TCRS was created by the state statute under Tennessee Code Annotated Title 8, Chapters 34-37. The TCRS Board of Trustees is responsible for the proper operation and administration of all employer pension plans in the TCRS. The Tennessee Treasury Department, an agency in the legislative branch of state government, administers the plans of the TCRS. The TCRS issues a publicly available financial report that can be obtained at www.treasury.tn.gov/tcrs.

Benefits Provided. Tennessee Code Annotated Title 8, Chapters 34-37 establishes the benefit terms and can be amended only by the Tennessee General Assembly. Members of the Teacher Retirement Plan are eligible to retire with an unreduced benefit at age 65 with 5 years of service credit or pursuant to the rule of 90 in which the member's age and service credit total 90. Benefits are determined by a formula using the member's highest five consecutive year average compensation and the member's years of service credit. A reduced early retirement benefit is available at age 60 and vested or pursuant to the rule of 80. Service related disability benefits are provided for non service related disability eligibility. The service related and non-service related disability benefits are determined in the same manner as a service retirement benefit but are reduced 10 percent and include projected service credits. A variety of death benefits are available under various eligibility criteria. Member and beneficiary annuitants are entitled to automatic cost of living adjustments (COLAs) after retirement. A COLA is granted each July for annuitants retired prior to the 2nd of July of the previous year. The COLA is based on the change in the consumer price index (CPI) during the prior calendar year, capped at 3 percent, and applied to the current benefit. No COLA is granted if the change in the CPI is less than one-half percent. A one percent COLA is granted if the CPI change is between one-half percent and one percent. A member who leaves employment may withdraw their employee contributions, plus any accumulated interest. Under the Teacher Retirement Plan, benefit terms and conditions, including COLA, can be adjusted on a prospective basis. Moreover, there are defined cost controls and unfunded liability controls that provide for the adjustment of benefit terms and conditions on an automatic basis.

Contributions. Contributions for teachers are established in the statutes governing the TCRS and may only be changed by the Tennessee General Assembly or by automatic cost controls set out in law. Teachers contribute 5 percent of salary. The Local Education Agencies (LEAs) make employer contributions at the rate set by the Board of Trustees as determined by an actuarial valuation. Per the statutory provisions governing the TCRS, the employer contribution rate cannot be less than 4 percent, except for in years when the maximum funded level, approved by the TCRS Board of Trustees, is reached. By law, employer contributions for the Teacher Retirement Plan are required to be paid. The TCRS may intercept the state shared taxes of the sponsoring governmental entity of the LEA if the required employer contributions are no remitted. Employer contributions for the year ended June 30, 2016 to the Teacher Retirement Plan were \$37,449, which is 4 percent of covered payroll. The employer rate, when combined with member contributions, is expected to finance the cost of benefits earned by members during the year, the cost of administration, as well as an amortized portion of any unfunded liability.

Pension Liabilities (Assets), Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

Pension Liabilities (Assets). At June 30, 2016, Dyersburg City Schools reported an asset of \$9,988 for its proportionate share of the net pension asset. The net pension asset was measured as of June 30, 2015, and the total pension asset used to calculate the net pension asset was determined by an actuarial value as of that date. Dyersburg City Schools' proportion of the net pension asset was determined by an actuarial value as of that date. Dyersburg City Schools' proportion of the net pension asset was based on Dyersburg City Schools' share of contributions to the pension plan relative to the contributions of all participating LEAs. At the measurement date of June 30, 2015, Dyersburg City Schools' proportion was 0.248278 percent.

Pension Expense. For the year ended June 30, 2016, Dyersburg City Schools recognized pension expense of \$13,090.

Deferred Outflows of Resources and Deferred Inflows of Resources. For the year ended June 30, 2016, Dyersburg City Schools reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources		Deferred Inflows of Resources	
Difference between expected and actual experience			\$	3,251
Net difference between projected and actual earnings on pension plan investments	\$	807		
Dyersburg City School's contributions subsequent to the measurement date of June 30, 2015		37,449		N/A
	\$	38,256	\$	3,251

Dyersburg City Schools' employer contributions of \$37,449 reported as pension related deferred outflows of resources, subsequent to the measurement date, will be recognized as a reduction in net pension liability in the year ended June 30, 2017. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Year Ended June 30:	
2017	\$ (69)
2018	(69)
2019	(69)
2020	(69)
2021	(271)
Thereafter	(1,896)

In the table above, positive amounts will increase pension expense, while negative amounts will decrease pension expense.

Actuarial assumptions. The total pension liability in the June 30, 2015 actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement.

Inflation	3.0 percent
Salary increases	Graded salary ranges from 8.97 to 3.71 percent based on age, including inflation, averaging 4.25 percent
Investment rate of return	7.5 percent, net of pension plan investment expenses, including inflation
Cost-of-Living Adjustment	2.5 percent

Mortality rates are customized based on the June 30, 2012 actuarial experience study and included an adjustment for expected future improvement in life expectancy.

The actuarial assumptions used in the June 30, 2012 actuarial valuation were based on the results of an actuarial experience study performed for the period July 1, 2008 through June 30, 2012. The demographic assumptions were adjusted to more closely reflect actual and expected future experience.

The long-term expected rate of return on pension plan investments was established by the TCRS Board of Trustees in conjunction with the June 30, 2012 actuarial experience study by considering the following three techniques: (1) the 25-year historical return of the TCRS at June 30, 2012, (2) the historical market returns of asset classes from 1926 to 2012 using the TCRS investment policy asset allocation, and (3) capital market projections that were utilized as a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. Four sources of capital market projections were blended and utilized in the third technique. The blended capital market projection established the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding inflation of 3 percent. The target allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

	Long-Term Expected Real	
Asset Class	Rate of Return	Target Allocation
U.S. Equity	6.46%	33%
Developed market international equity	6.26%	17%
Emerging market international equity	6.40%	5%
Private equity and strategic lending	4.61%	8%
U.S. fixed income	0.98%	29%
Real estate	4.73%	7%
Short-term securities	0.00%	1%
	<u></u>	100%

The long-term expected rate of return on pension plan investments was established by the TCRS Board of Trustees as 7.5 percent based on a blending of the three factors described above.

Discount Rate. The discount rate used to measure the total pension liability was 7.5 percent. The projection of cash flows used to determine the discount rate assumed that employee contributions will be made at the current rate and that contributions from the LEAs will be made at the actuarially determined contribution rate pursuant to an actuarial valuation in accordance with the funding policy of the TCRS Board of Trustees and as required to be paid by state statute. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make projected future benefit payments of current active and inactive members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the Proportionate Share of Net Pension Liability (Asset) to Changes in the Discount Rate. The following presents Dyersburg City Schools' proportionate share of the net pension liability (asset) calculated using the discount rate of 7.5 percent, as well as what Dyersburg City Schools' proportionate share of the net pension liability (asset) would be if it were calculated using a discount rate that is 1-percentage-point lower (6.5 percent) or 1-percentage-point higher (8.5 percent) than the current rate.

	Current		
	1% Decrease (6.5%)	Discount Rate (7.5%)	1% Increase (8.5%)
Dyersburg City Schools' proportionate share of the net pension liability (asset)	\$1,771	(\$9,998)	(\$18,612)

Pension Plan Fiduciary Net Position. Detailed information about the pension plan's fiduciary net position is available in a separately issued TCRS financial report.

3. Pension Plan

Plan Description. The Dyersburg City Schools Retirement Plan (DCSRP) is a single-employer defined benefit retirement plan administered by the Dyersburg City Schools' Board of Education for employees of the Dyersburg City Schools. The plan was established by statute. With the exception of maximum contribution rates, which are set forth in the statutes, required contributions and benefit provisions are established and amended by the Dyersburg City Schools Board of Education.

The Dyersburg City Schools Retirement Plan issues a publicly available report that can be obtained by contacting the Dyersburg City Schools Board of Education.

Benefits Provided. DCSRP provides retirement, disability, and death benefits to plan members and their beneficiaries. Retirement benefits are calculated as 3 percent of an employee's final 5-year average salary times years of service. Employees with 10 years of continuous service are eligible to retire at age 60. Employees may retire at any age after 30 years of service. Disability retirement benefits are determined in the same manner as retirement benefits but are payable immediately without an actuarial reduction. Death benefits equal two times the employee's final full-year salary. An employee who leaves service may withdraw his or her contributions, plus any accumulated interest.

Benefit terms provide for annual cost-of-living adjustments to each employee's retirement allowance subsequent to that employee's retirement date. Annual adjustments equal one-half of the change in the Consumer Price Index, limited to a maximum increase in retirement allowance of 3 percent.

At December 31, 2015, the following employees were covered by the Plan:

Active employees	101
Inactive employees or beneficiaries currently receiving benefits	38
Inactive employees of beneficialities currently receiving benefits	4
mactive employees entitled to but not yet receiving	143

Contributions. Required contributions are determined by the Dyersburg City Schools Board of Education based on actuarial calculations performed by an independent actuary. The actuarially determined rate is the estimated amount necessary to finance the costs of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability.

Employee contributions are based on the employee's annual covered salary. For the year ended December 31, 2015, the employee contribution rate was 5%. The Dyersburg City Schools' Board of Education is required to contribute the difference between the actuarially determined rate and the contribution rate of employees. However, per statute, the Dyersburg City Schools' contribution rate may not exceed 15 percent of covered payroll. The Dyersburg City Schools' contribution rate and required contribution for the year ended December 31, 2015 were 5 percent and \$39,835, respectively. Actual contributions for the year equaled \$39,835, or 100% of required contributions.

Net Pension Liability. The Dyersburg City Schools' net pension liability was measured as of December 31, 2015 and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The total pension liability in the December 31, 2015 actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

	3.0 percent4.5 percent, including inflation7.25 percent, net of Plan investment expense, including inflation
Investment rate of return	7.25 percent, flet of Flatt investment expense, moldaing initiation

The actuarial assumptions used in the December 31, 2015 valuation were based on the results of an actuarial experience study for the period January 1, 2015 - December 31, 2015. In addition, mortality rates were based on the RP-2000 Combined Mortality Table for Males or Females, as appropriate, with adjustments for mortality improvements based on Scale AA.

The long-term expected rate of return on Plan Investments was determined using a building-block method in which bestestimate ranges of expected future real rates of return (expected returns, net of Plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

	Target Allocation	Long-term Expected Real Rate of Return
Domestic equities	45%	8.0%
International equities	25%	7.5%
Fixed income	4%	2.0%
Real estate	1%	5.0%
Cash	25%	0.0%
Total	100%	

Discount Rate. The discount rate used to measure the total pension liability was 7.25 percent. The projection of cash flows used to determine the discount rate assumed that employee contributions will be made at the current contribution rate and that contributions from employers will be made at contractually required rates, actuarially determined. Based on those assumptions, the Plan's fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on Plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Changes in School's Net Pension Liability. Changes in the Dyersburg City Schools' net pension liability for the year ended June 30, 2016 were as follows:

Schedule of Changes in NPL, Deferrals, & Pension Expense - Non Professional Plan

	Increase (Decrease)		
	Total Pension Liability (a)	Plan Net Position (b)	Net Pension Liability (a) - (b)
Balances at 12/31/2014	\$ 6,756,232	\$ 4,916,641	\$ 1,839,591
Changes for the Year:			
Service cost	147,466		147,466
Interest expense	489,615		489,615
Benefit changes			-
Experience losses (gains)			-
Changes of assumptions			-
Contributions - employer		105,681	(105,681)
Contributions - employee		137,977	(137,977)
Net investment income		(56,730)	56,730
Expected return on plan investments			-
Current expense of asset (gain)/loss			-
Non expensed asset gain/(loss)			-
Benefits paid	(300,765)	(300,765)	-
Plan administrative expenses		(7,271)	7,271
Recognition of prior post-measurement contribution			-
Post-measurement contribution			-
Other changes			
Amortization of or change in beginning balances			-
Net changes	336,316	(121,108)	457,424
Balances at 12/31/2015	\$ 7,092,548	\$ 4,795,533	\$ 2,297,015

Determination of Net Pension Liability. The components of the net pension liability at December 31, 2015 were as follows:

	<u>December 31, 2015</u>
Total Pension Liability (7.25%) Plan Fiduciary Net Position Net Pension Liability	\$ 7,092,548 (4,795,533) \$ 2,297,015
Plan Fiduciary Net Position as a % of Total Pension Liability	67.61%

Sensitivity of Net Pension Liability to Discount Rate. The following represents the net pension liability calculated using the stated discount rate, as well as what the net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower or 1-percentage-point higher than the current rate:

	1% Decrease	Current Rate	1% Increase
	(6.25%)	(7.25%)	(8.25%)
Net Pension Liability	\$3,200,553	\$2,297,015	\$1,537,175

Plan Fiduciary Net Position. Detailed information about the Plan's fiduciary net position is available in the separately issued Dyersburg City Schools Retirement Plan financial report.

Pension Expense, Deferred Outflows of Resources, and Deferred Inflows of Resources. For the year ended June 30, 2016, the Dyersburg City schools recognized pension expense of \$253,241. At June 30, 2016, the Dyersburg City Schools reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred		Deferred		
	Outflows of		Inflows of		
	Re	Resources		Resources	
Differences between expected and actual experience	\$	-	\$	9,034	
Changes of assumptions		-		-	
Net difference between projected and actual earnings on Plan investment		392,877		-	
Dyersburg City School's contributions subsequent to the measurement date of December 31, 2015		73,091			
Total	\$	465,968	\$	9,034	

Amounts reported as deferred outflows of resources and deferred inflows of resources will be recognized in pension expense as follows:

Year ending June 30,	
2017	\$ 100,988
2018	100,988
2019	100,986
2020	80,881
2021	-
Thereafter	

Payable to DCSRP. At June 30, 2016, the Dyersburg City Schools Board of Education reported a payable of \$9,320 for the outstanding amount of contributions due to DCSRP for the year.

Dyersburg Electric System

1. Dyersburg Electric System Retirement Plan

The Retirement Committee accounts for the activity of the Dyersburg Electric System Retirement Plan and the Dyersburg Electric System 401(a) Defined Contribution Plan. The first is a defined benefit single-employer public employee retirement system (PERS). The second is a defined contribution PERS.

Plan Description. All employees of the System were eligible to participate following the attainment of age 21 and the completion of three (3) years of service. On December 19, 2012 the Power Board adopted resolutions to discontinue new participants in to the existing defined benefit plan and established the new defined contribution retirement plan. Employees hired or rehired after December 31, 2012 and meeting the eligibility requirements participate in the Defined Contribution Plan, and existing participants in the Defined Benefit Plan may elect to participate in the defined contribution plan provided they discontinue participation in the Defined Benefit Plan. This plan is administered by Dyersburg Electric System. The Defined Benefit Plan's Board is the Board of the System. Any amendments to the Defined Benefit Plan would be initiated by the System's Board.

Plan participants. At January 1, 2015 valuation, pension plan participants consisted of the following:

Active plan participants (vested)	36
Inactive plan participants or beneficiaries currently receiving benefits	2
Total plan participants	38

As of December 31, 2012, the plan is closed to new entrants.

Benefits Provided. The Defined Benefit Plan provides retirement benefits as well as death and disability benefits. The Defined Benefit Plan benefit formula accrual rate is 2.0% per year of service. Retirement benefits begin vesting after five (5) years of service and are completely vested after fifteen (15) years of service. Employees may retire after age 55 and the completion of ten (10) years of service with a reduction for early commencement. There is no reduction if the employees' age plus years of service is 85 or greater. The normal retirement date is the first day of the month following the participant's attainment of age 65.

Contributions. Employees are required to contribute 1% of compensation. Dyersburg Electric System intends to contribute amounts necessary to fund the Plan, as determined by the Actuary. For the year ended June 30, 2015, the system's contribution rate was 26.29% of covered-employee payroll.

Investment Policy. The following was the Plan's adopted asset allocation policy as of June 30, 2015, as provided by the Plan's investment advisor.

Asset Class	Asset Category	Strategic Weight
Domestic Equity	Large Growth	10%
Domestic Equity	Lg Value/Long/Short	35%
Domestic Equity	Long/short	5%
Alternative	Multi-Strategy	10%
Alternative	Event Driven/Fixed	15%
Alternative	Managed Futures	10%
Balanced	Global Allocation	5%

Rate of return. For the year ended June 30, 2015, the annual money-weighted rate of return on pension investments, net of pension plan investment expenses, was -2.52%. The money-weighted rate of return expresses investment performance, net of investment expenses, adjusted for the changing amounts actually invested.

Net Pension Liability. The System's net pension liability of \$3,976,465 was measured as of June 30, 2015, and the total pension liability used to calculate net pension liability was determined by an actuarial valuation as of January 1, 2015.

Actuarial assumptions. The total pension liability was determined by an actuarial valuation as of January 1, 2015, using the following actuarial assumptions, applied to all periods included in the measurement.

Measurement Date:

The January 2015 valuation report is based on the cost method and assumptions noted above. Most assumptions remained the same as those for the prior valuation. However, the discount rate assumption was changed from 7.50% to 6.75%. The mortality table is now linked to the current mortality assumption utilized by the Tennessee Consolidated Retirement System (TCRS). The net effect of these two changes in assumption result in a \$1,394,000 approximate increase to the liability.

There have been no plan changes since the January 2015 valuation report.

The following information was provided by the Plan's investment advisor. The long-term expected rate of return on pension plan investments was determined using an arithmetic basis and a time horizon on 10-15 years.

Asset Class	Long-term Expected Rate of Return
Large Blend	7-10%
Large Value	7-10%
Alternatives	5-7%
Event Driven/Fixed Income	6-8%
Managed Futures	8-9%
Global Balanced	6-8%

Discount Rate. The discount rate used to measure the total pension liability was 6.75%. The projection of cash flows used to determine the discount rate assumed that the plan and member contributions will be made at the current contribution rate. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments (6.75%) was applied to all periods of projected benefit payments to determine the total pension liability.

2021	\$ (27,559)
Thereafter	\$ 341,716

Payable to the Pension Plan. At June 30, 2016, the system reported a payable of \$0 for the outstanding amount of contributions to the pension plan.

2. Defined Contribution Plan

Plan Name and Administration. The System's plan name is Dyersburg Electric System 401(a) Defined Contribution Plan. The plan is administered by VOYA Financial Advisors, Inc. The Board of the System is the decision making authority for the plan.

Benefit Terms. All employees of the System are eligible to make contributions to Dyersburg Electric System's 401(a) Defined Contribution Plan after a 6 month probationary period. After the probationary period, the System makes contributions whether or not the employee does. An employee is considered fully vested after the probationary period is met. Benefit terms may only be amended by the Board of the System.

Contributions. The Defined Contribution Plan requires the system to contribute 3% of gross wages of employees meeting the eligibility requirements. The system will also match a contribution of an eligible employee (dollar for dollar) up to 4% of gross wages. The employees are not required to contribute any certain amount to the plan. During the year ended June 30, 2016, the system contributed \$6,953 to the defined contribution plan. There were no nonemployer contributions for the year.

Forfeitures. Due to the terms of the contributions being 100% vested immediately, there are never any amounts forfeited.

Payable to Defined Contribution Plan. At June 30, 2016, there were no amounts due from the System for contributions to the defined contribution plan.

City of Dyersburg Pension Plan

Plan Description. The City of Dyersburg Pension Board administers the City of Dyersburg Pension Plan, a single employer defined benefit pension plan that provides pensions for all permanent full-time general and public safety employees of the City, The regulations of the City grant the authority to establish and amend the benefit terms to the City of Dyersburg Pension Board.

At June 30, 2015, the following employees were covered by the Plan:

Active employees	186
Inactive employees or beneficiaries currently receiving benefits	33
Inactive employees entitled to deferred benefits	39
Total	258

Contributions. The Regulations of the City grant the authority to establish and amend the contribution requirements of the City and active plan members to the City of Dyersburg Pension Board. The Board establishes rates based on an actuarially determined rate recommended by an independent actuary. The actuarially determined rate is the estimated amount necessary to finance the costs of benefit earned by plan members during the year, with an additional amount to finance any unfunded accrued liability. For the year ended June 30, 2015, the average active member contribution rate was 5.0 percent of annual pay, and the City's average contribution rate was 9.5 percent of annual payroll.

The City selected the assumptions and funding methods described below based on the review of plan experience in conjunction with the July 1, 2015 Actuarial Valuation Report. The actuary annually reviews the assumptions and method for reasonableness. Periodically, a complete plan experience study is conducted.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation (3%). Best estimates of arithmetic real rates of return for each major asset class included in the pension plan's target asset allocation are summarized in the following table:

The pension plan's policy in regard to the allocation of invested assets is established and may be amended by the Pension Board by a majority vote of its members. It is the policy of the Pension Board to pursue an investment strategy that reduced risk through the prudent diversification of the portfolio across a broad selection of distinct asset classes. The pension plan's investment policy discourages the use of cash equivalents, except for liquidity purposes, and aims to refrain from dramatically shifting asset class allocations over short time spans.

Asset Class	Actual Allocation	Long-Term Expected Real Rate of Return
Domestic Equities	63.42%	6.25%
Developing Markets	3.20%	6.75%
Fixed Income	11.78%	1.25%
Real Estate	7.71%	5.75%
Cash	13.89%	0.50%
Total	100.00%	

Discount Rate. 3.95% per annum, compounded annually. The projection of cash flows used to determine the discount rate assumed that plan member contributions will be made at the current contributions rate of 5% and that employer contributions will continue at approximately 47% of the recommended contribution rate. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members through June 30, 2025. The long-term expected rate of return on pension plan investments was applied to periods of projected benefit payments through this date, and the municipal bond rate was used for the period thereafter to determine the total pension liability. The discount used to measure the total pension liability on the second basis was 3.8%. This is equivalent to an average assumed rate of return of approximately 3.95%.

Net Pension Liability. The components of the net pension liability at June 30, 2015 were as follows:

Total Pension Liability	\$40,369,610
Plan Fiduciary Net Position	\$ (2,824,235)
Net Pension Liability	\$ 37,545,375

Plan Fiduciary Net Position as a Percentage of Total Pension Liability. 7%

Sensitivity of the Net Pension Liability to Changes in the Discount Rate. The following represents the net pension liability calculated using the stated discount rate, as well as what the net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower or 1-percentage-point higher than the current rate:

	Discount Rate	Net Pension Liability
1% decrease	2.95%	\$ 43,322,288
Current discount rate	3.95%	\$ 37,545,375
1% increase	4.95%	\$ 32,818,621

Pension Expense, Deferred Outflows of Resources, and Deferred Inflows of Resources. For the year ended June 30, 2016, the recognized pension expense will be \$3,123,164. At June 30, 2015, the City reported deferred outflows of resources and deferred inflows of resources relation to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources		
Experience losses (gains)	\$ 2,350,135	\$	-	
Changes of assumptions	16,943,150		-	
Net difference between projected and actual earnings on investments	33,658	18	88,587	
Total:	\$ 19,326,943	\$ 18	38,587	

Amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense (income) as follows:

Years Ending June 30:	
2017	\$ 1,812,302
2018	\$ 1,812,302
2019	\$ 1,812,302
2020	\$ 1,875,164
2021	\$ 1,866,750
Thereafter	\$ 9,959,537

In addition, GASB Statement No. 71 requires contributions between the measure date (June 30, 2015) and the disclosure date (June 30, 2016) for Statement No. 68 to be reported as a deferred outflow of resources. The expected contributions for this period are \$2,000,000.

F. Postemployment Healthcare Plan

Dyersburg City Schools

1. Plan Description

The Dyersburg City Schools participates in the state-administered Teacher Group Insurance Plan, for healthcare benefits. For accounting purposes, the plan is agent multiple-employer defined benefit OPEB plans. Benefits are established and amended by an insurance committee created by Tennessee Code Annotated (TCA) 8-27-302 (teachers). Prior to reaching the age of 65, all members have the option of choosing a preferred provider organization (PPO), point of service (POS), or health maintenance organization (HMO) plan for healthcare benefits. Subsequent to age 65, members who are also in the state's retirement system may participate in a state-administered Medicare supplement plan that does not include pharmacy. The plans are reported in the State of Tennessee Comprehensive Annual Financial Report (CAFR). The (CAFR) is available on the state's website at http://tennessee.gov/finance/act/cafr.html.

2. Funding Policy

The premium requirements of plan members are established and may be amended by the insurance committee. The plans are self-insured and financed on a pay-as-you-go basis with the risk shared equally among the participants. Claims liabilities of the plan are periodically computed using actuarial and statistical techniques to establish premium rates. The employers in each plan develop their own contribution policy in terms of subsidizing active employees or retired employees' premiums since the committee is not prescriptive on that issue. The state does not provide a subsidy for local government participants, however, the state does provide a partial subsidy to Local Education Agency pre-65 teachers and a full subsidy based on years of service for post-65 teachers in the Medicare Supplement Plan.

Annual OPEB Cost and Net OPEB Obligation (dollars in thousands)						er Group Plan
ARC Interest on the NPO Adjustment Annual OPEB cost Amount of contribution Increase/Decrease in NPO Net OPEB obligation - beginning of year Net OPEB obligation - end of year			\$	400,000 70,264 (60,848) 409,416 (218,175) 191,240 1,561,426 1,752,666		
Year End*	Plan		Annual PEB Cost	Percentage of Annual OPEB Cost Contributed		Net OPEB Obligation At Year End
6/30/2016	Teacher Group	\$	409,416	53.29%		\$1,752,666

3. Funded Status and Funding Progress

The funded status of the plan as of July 1, 2015, was as follows (dollars in thousands):

	<u>Teacher Group Plan</u>
Actuarial valuation date	7/1/2015
Actuarial accrued liability (AAL)	\$ 4,415,000
Actuarial value of plan assets	
Unfunded actuarial accrued liability (UAAL)	\$ 4,415,000
Actuarial Value of Assets as a % of the AAL	0%
Covered payroll (active plan members)	\$ 12,560,273
UAAL as a percentage of covered payroll	35.15%

Actuarial valuations involve estimates of the value of reported amounts and assumptions about the probability of events far into the future, and actuarially determined amounts are subject to continual revision as actual results are compared to past expectations and new estimates are made about the future. The schedule of funding progress, presented as RSI following the notes to the financial statements, presents multiyear trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liability for benefits.

4. Actuarial Methods and Assumptions

Calculations are based on the types of benefits provided under the terms of the substantive plan at the time of each valuation and on the pattern of sharing of costs between the employer and plan members to that point. Actuarial calculations reflect a long-term perspective. Consistent with that perspective, actuarial methods and assumptions used include techniques that are designed to reduce short-term volatility in actuarial accrued liabilities and the actuarial value of assets.

In the July 1, 2011, actuarial valuation, the projected unit credit actuarial cost method was used. The actuarial assumptions included a 4.5% investment rate of return (net of investment expenses) and an annual healthcare cost trend rate of 10% initially, reduced by 0.5% per year to an ultimate rate of 5.0% after ten years. Both rates include a 3% inflation assumption. The unfunded actuarial accrued liability is being amortized as a level percentage of payroll on a closed basis over a 30 year period beginning with the fiscal year ended June 30, 2008.

G. Fairview Cemetery Trust Fund

Pursuant to the General Cemetery Act of 1968, the Fairview Cemetery Trust was established by the City in May of 1969. The purpose of the Trust is to provide perpetual "improvement care" of the cemetery grounds as defined in TCA Section 46-102 (11). However, such care shall be furnished only insofar as net income derived from the trust will permit.

In the trust document, the City agrees to deposit in this trust minimum monthly amounts equivalent to one-half the sales price of cemetery lots and mausoleums plus one-half the amounts received for special care of any lot, grave, mausoleum, monument, etc. The trustee is to pay the net income from the trust to the City at regular intervals which are to be not more frequent than quarterly.

H. Prior Period Adjustments

City of Dyersburg

In the prior fiscal year (2014-2015) a receivable was set up for grant proceeds. When all proceeds were received there was an amount of \$28,856 left in accounts receivable. This amount was miscalculated in the prior period and should not have been a receivable in the Capital Projects Fund. The City also reported a prior period adjustment in the General Fund in the amount of \$194,268. This adjustment was needed to account for the reimbursement of property taxes received and collected in prior years from a local industry that appealed the assigned property tax values and related assessments.

CITY OF DYERSBURG, TENNESSEE DYERSBURG CITY SCHOOLS SCHEDULE OF FUNDING PROGRESS - POST EMPLOYMENT HEALTHCARE PLAN FOR THE FISCAL YEAR ENDED JUNE 30, 2016

Actuarial Valuation Date	Actua Valu Ass	e of	Actuarial Accrued Liability (AAL)	 Unfunded AAL (UAAL)	Funded Ratio	 Covered Payroll	UAAL as a Percentage of Covered Payroll)

CITY OF DYERSBURG, TENNESSEE SCHEDULE OF CONTRIBUTIONS BASED ON PARTICIPATION IN THE CITY OF DYERSBURG PENSION PLAN FOR THE FISCAL YEAR ENDED JUNE 30, 2016

	_	2015	 2014
Actuarially determined contribution	\$	2,100,000	\$ 1,507,494
Contributions in relation to the actuarially determined contribution		700,000	 724,200
Contribution deficiency (excess)	\$	1,400,000	\$ 783,294
Covered-employee payroll	\$	7,700,000	\$ 8,003,375
Contributions as a percentage of covered-employee payroll		9.50%	9.05%

This is a 10-year schedule. However, the information in this schedule is not required to be presented retroactively. Years will be added to this schedule in future fiscal years until 10 years of information is available.

Notes to Schedule

Valuation date: Actuarially determined contribution rates are calculated as of June 30.

Methods and assumptions used to determine contribution rates:

Actuarial cost method:

Entry age normal

Amortization method:

Level dollar, open (not to exceed 10 years)

Remaining amortization period:

10

Asset valuation:

No smoothing period

Inflation

3.0%

Salary increases:

N/A

Salary Increases.

7.5%

Investment rate of return Retirement age:

N/A

Mortality:

RP-2000 (Healthy and Disabled) with generational projection

per Scale AA for healthy participants

Cost of living adjustments:

2.5%

CITY OF DYERSBURG, TENNESSEE SCHEDULE OF FUNDING PROGRESS - EMPLOYEE RETIREMENT SYSTEM FOR THE FISCAL YEAR ENDED JUNE 30, 2016

Actuarial Valuation Date	Actuarial Value of Assets	Actuarial Accrued Liability (AAL)	Unfunded AAL (UAAL)	Funded Ratio	Covered Payroll	UAAL as a Percentage of Covered Payroll
7/1/2015	\$ 2,008,959	\$ 20,583,408	\$ 18,574,449	9.76%	\$ 7,700,000	241.22%
7/1/2014	3,619,606	25,997,752	22,378,146	13.92%	8,003,375	279.61%
7/1/2013	4,004,450	15,516,122	11,511,672	25.81%	10,631,688	108.28%
7/1/2011	4,263,221	14,829,284	10,566,063	28.75%	11,070,387	95.44%

- a. The comparability of trend information is affected by changes in actuarial assumptions, benefit provisions, actuarial funding methods, accounting policies, and other changes. Those changes usually affect trends in contribution requirements and in ratios that use the pension benefit obligations as a factor.
- b. Looking at the actuarial accrued liability or the unfunded actuarial accrued liability in isolation can be misleading.
 - (i.) Expressing the actuarial value of assets as a percentage of the actuarial accrued liability provides one indication of the extent to which a plan is funded. Analysis of this percentage over time indicates whether the plan is becoming financially stronger or weaker. Generally, the greater this percentage, the stronger the plan is.
 - (ii.) Expressing the unfunded actuarial accrued liability as a percentage of the annual covered payroll approximately adjusts for the effects of inflation and aids analysis of funding progress. Generally, the smaller the unfunded percentage, the stronger the plan.

Independent Auditor's Report On Internal Control Over Financial Reporting And On Compliance And Other Matters Based On An Audit Of Financial Statements Performed in Accordance With Government Auditing Standards

Board of Mayor and Aldermen City of Dyersburg Dyersburg, Tennessee

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to the financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Dyersburg, Tennessee (the City), as of and for the year ended June 30, 2016, and the related notes to the financial statements, which collectively comprise the City's basic financial statements, and have issued our report thereon dated July 22, 2017.

Our report includes a reference to other auditors who audited the financial statements of Dyersburg Electric System, as described in our report on the City's financial statements. This report includes our consideration of the results of the other auditor's testing of internal control over financial reporting and compliance and other matters that are reported on separately by those other auditors. However, this report, insofar as it relates to the results of the other auditors, is based solely on the reports of the other auditors.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the City's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the City's internal control. Accordingly, we do not express an opinion on the effectiveness of the City's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. However, as described in the accompanying schedule of findings and responses, we and the other auditors did identify certain deficiencies in internal control that we consider to be material weaknesses and significant deficiencies.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the City's financial statements will not be prevented, or detected and corrected on a timely basis. We and the other auditors consider the deficiency described in the accompanying schedule of findings and responses as item 2016-001 for the Dyersburg Electric System to be a material weakness.

A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness yet important enough to merit attention by those charged with governance. We and the other auditors consider the deficiencies described in the accompanying schedule of findings and responses as items 2016-001, 2016-002 and 2016-003 for the Dyersburg City Schools and 2016-001 for the City of Dyersburg to be significant deficiencies.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the City's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests and those of the other auditors disclosed instances of noncompliance or other matters that are required, to be reported under *Government Auditing Standards*, and which are described in the accompanying schedule of findings and responses as items 2016-001 for the Dyersburg Electric System, 2016-001 for the City of Dyersburg, and 2016-003 for the Dyersburg City Schools.

City's Response to Finding

The City's response to the finding identified in our audit is described in the accompanying schedule of findings and responses. The City's response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the City's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the City's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Alexander Thompson Arnold PLLC

Dyersburg, Tennessee July 22, 2017

CITY OF DYERSBURG, TENNESSEE SCHEDULE OF FINDINGS AND RESPONSES FOR THE FISCAL YEAR ENDED JUNE 30, 2016

SECTION I - Financial Statement Findings

Dyersburg City Schools

2016-001 Purchase Orders (Significant Deficiency)

<u>Condition</u>: Dyersburg City Schools did not consistently follow proper purchasing procedures regarding purchase orders. Expenditures were noted that exceeded purchase order limits.

<u>Criteria</u>: Purchase orders are necessary to control purchasing authority and document purchasing commitments. The budget process is circumvented when expenditures are allowed to exceed purchase order limits.

Effect: Allowing expenditures to exceed purchase order limits could result in the budget being exceeded.

<u>Recommendation</u>: To strengthen internal controls over purchasing procedures, the School should verify that expenditures do not exceed purchase order amounts.

Response: We agree.

2016-002 Segregation of Duties (Significant Deficiency)

Condition: Dyersburg City Schools has inadequate segregation of duties in the record keeping function.

<u>Criteria</u>: Adequate segregation of duties is important in order to facilitate controls and maintain adequate safeguards over the school.

<u>Effect</u>: Without the proper segregation and accountability, the school could incur losses with respect to the potential for misappropriation of cash transactions.

<u>Recommendation</u>: While it is understandable that it is not always feasible to segregate duties due to limited accounting staff, we encourage the school to make efforts to further segregate the duties of the accounting staff.

Response: Our organization is too small to justify hiring additional personnel. We realize a weakness exists, but it is not cost effective for us to hire additional staff.

2016-003 Expenditures Exceed Approved Budget (Significant Deficiency and Noncompliance)

Condition: Expenditures in the General Purpose Fund were greater than approved budgetary amounts.

<u>Criteria</u>: Tennessee Code Annotated (TCA) 6-56-203 states "notwithstanding any other provision or law, no municipality may expend any monies regardless of their source except in accordance with a budget ordinance adopted under this section."

Effect: The fund should not incur expenditures in excess of budgeted amounts.

Recommendation: We recommend that expenditures are monitored to comply with approved budgetary limitations.

Response: We will monitor expenditures and/or request budgetary amendments to permit the fund to operate effectively and efficiently.

CITY OF DYERSBURG, TENNESSEE SCHEDULE OF FINDINGS AND RESPONSES FOR THE FISCAL YEAR ENDED JUNE 30, 2016

Dyersburg Electric System

2016-001 Dual Signatures (Material Weakness and Noncompliance)

<u>Condition</u>: We noted two bank accounts, the petty cash account and payroll account, that are impress in nature with minimal or zero carrying balances, in which the checks from the accounts only require one signature.

<u>Criteria</u>: Tennessee Code Annotated Section 9-2-102 states that "It is the duty of the department of audit to prescribe a uniform system of bookkeeping designating the character of books, reports, receipts, and records, and the method of keeping same, in all state, county, and municipal offices, including utility districts, which handle public funds. It is the duty of all officials to adopt and use the system and the character of books, reports, and records designated; provided, that the comptroller of the treasury may approve any existing system." The State of Tennessee, Comptroller of the Treasury has also issued an Internal Control & Compliance Manual for Tennessee Municipalities stating in Title 5, Chapter 11, Sections 7 that "two authorized signatures are required for all checks."

Effect: Potential for unauthorized disbursements.

Recommendation: We recommend that all checks issued require two signatures. Furthermore, the banks should be informed that two signatures are required on all disbursements as well.

<u>Response</u>: Management is of the learned opinion that there are more than adequate controls currently in place to mitigate any risk associated with this finding. It should be noted that the two accounts (Petty Cash Fund and Payroll Fund) normally maintain a very minimal or zero balance.

The Petty Cash Fund is maintained as a checking account. Checks are issued from this fund for minimal expenses and need only one signature from the CEO, CFO or Management Aide for disbursement. A detailed report of each check written from this fund is provided to the CEO and CFO at the time of replenishment. The fund is replenished by a check issued from the General Fund which requires two signatures (CEO, CFO or Board Member).

The Payroll Account is basically a clearing account and the CEO or CFO can sign payroll checks. This account maintains a zero balance and is replenished to cover the current payroll costs. A General Fund check, which requires two signatures (CEO,CFO or Board Member) is issued at the end of each payroll period to cover the current week's payroll costs. Detailed reports of the weekly payroll are made available to management at the time of signing the payroll checks and at the time of replenishing the Payroll Account.

These procedures have been in place for many years and prior financial audits have deemed this arrangement a non-issue.

CITY OF DYERSBURG, TENNESSEE SCHEDULE OF FINDINGS AND RESPONSES FOR THE FISCAL YEAR ENDED JUNE 30, 2016

General Government

2016-001 Expenditures Exceed Approved Budget (Significant Deficiency and Noncompliance)

<u>Condition</u>: Expenditures in the TIP Fund were greater than approved budgetary amounts.

<u>Criteria</u>: Tennessee Code Annotated (TCA) 6-56-203 states "notwithstanding any other provision or law, no municipality may expand any monies regardless of their source except in accordance with a budget ordinance adopted under this section."

Effect: The fund should not incur expenditures in excess of budgeted amounts.

Recommendation: We recommend that expenditures are monitored to comply with approved budgetary limitations.

Response: We will monitor expenditures and/or request budgetary amendments to permit the fund to operate effectively and efficiently.

CITY OF DYERSBURG, TENNESSEE MANAGEMENT'S CORRECTIVE ACTION PLAN FOR THE FISCAL YEAR ENDED JUNE 30, 2016

Corrective Action Plan

The City of Dyersburg, Tennessee respectfully submits the following corrective action plan for the year ended June 30, 2016.

Name and address of independent public accounting firm:

Alexander Thompson Arnold PLLC 185 North Church Street Dyersburg, TN 38024

Responsible officials for corrective action:

Neel Durbin, Director Dyersburg City Schools

Steve Anderson, Treasurer City of Dyerbsurg, TN

Robby Richards, VP Finance Dyersburg Electric System

Audit period:

June 30, 2016

Dyersburg City Schools

2016-001 Purchase Orders (Significant Deficiency)

<u>Recommendation</u>: To strenghthen internal controls over purchasing procedures, the School should verify that expenditures do not exceed purchase order amounts.

Action taken or planned: We agree.

2016-002 Segregation of Duties (Significant Deficiency)

<u>Recommendation</u>: While it is understandable that it is not always feasible to segregate duties due to limited accounting staff, we encourage the school to make efforts to further segregate the duties of the accounting staff.

Action taken or planned: On July 1, 2016 Dyersburg City Schools hired an additional person in the accounting department to help with the segregation of duties.

CITY OF DYERSBURG, TENNESSEE MANAGEMENT'S CORRECTIVE ACTION PLAN FOR THE FISCAL YEAR ENDED JUNE 30, 2016

Dyersburg City Schools (continued)

2016-003 Expenditures Exceed Approved Budget

<u>Recommendation</u>: To strengthen internal controls over purchasing procedures, expenditures should be monitored for budgetary guidelines.

Action taken or planned: We agree.

Dyersburg Electric System

2016-001 Dual Signatures

<u>Recommendation</u>: All checks issued should have two signatures and the banks should be informed that two signatures are required on all disbursements.

Action taken or planned: Management will review bank accounts in questions and verify adequacy of controls in place to monitor bank account activity.

General Government

2016-01 Expenditures Exceed Approved Budget

<u>Recommendation</u>: To strengthen internal controls over purchasing procedures, expenditures should be monitored for budgetary guidelines.

Action taken or planned: We agree.
