Is disturbance more than 1 acre? YES NO

Is construction site part of a larger common plan of development or sale, such as a single lot within a larger subdivision? YES NO

Note: If you answered yes to either of the questions above, you cannot be exempted and must submit a SWPPP with your NOI. If you answered no to the preeceeding questions, you must give a brief explanation of the measures you plan to implement to prevent polluted runoff from leaving the site mentioned and characteristics of site. (i.e. site has no harsh slopes, and we intend to install silt fence along the ditches and install gravel on the entrance to prevent vehicle tracking onto streets.)

Narrative

The above mentioned lot is 195' Deep x 200' wide, and slopes from front to rear approximately 1". Standing in the street, there is a 3' wide x 2' deep ditch flowing from front to rear. The lot will be graded, seeded with Bermuda and mulched. The lot will be protected on the rear and next to the ditch with type A silt fence, and driveway will be installed and graveled before any other construction is started. Any sediment or debris tracked on to the street will be removed immediately to prevent further tracking. The controls will be inspected and maintained weekly and before and after each rain event of one half inch or greater. In the event that controls fail, I will assess the problems and modify my controls.
